

HOW TO CREATE A

Meta Business Manager

A Simple Step-by-Step Guide for Beginners

Prepared by Manus AI | March 2026

This guide walks you through every step needed to create your Meta Business Manager account from scratch. No prior experience required.

Before You Start

To create a Meta Business Manager, you only need two things: a personal Facebook account (used to verify your identity) and a valid business email address. Your personal profile will remain completely separate from your business account.

■ **Important:** Do not use a shared or team email address. Use a personal work email that only you can access, as you will need to confirm it.

The Setup Steps

1

Go to the Business Manager Website

Open your browser and go to **business.facebook.com**. You will see a prompt to log in or create an account.

Click "**Log in with Facebook**" and enter your personal Facebook account credentials. This is only used to verify who you are.

2 Click "Create Account"

Once logged in, click the **"Create Account"** button on the screen. A form will appear asking for three pieces of information:

- **Business Name** — The official name of your business.
- **Your Name** — Your full name.
- **Business Email Address** — A work email address you can access.

When done, click **"Submit."**

3 Confirm Your Email Address

Check your inbox for a confirmation email from Meta. Open the email and click the **"Confirm Now"** link inside it.

This step activates your account. Without it, your Business Manager will have limited functionality.

4 Add Your Business Details

After confirming your email, Meta will ask for a few more details about your business. Fill in the following:

- **Business Legal Name**
- **Business Address**
- **Phone Number**
- **Website URL**

Click **"Submit"** when done. Make sure all information is accurate as it may be used for business verification.

Your Meta Business Manager is now created. From here, you can go to **Business Settings** to add your Facebook Page, Instagram account, and Ad Account.
